Thank you for visiting our website!

It is my pleasure to welcome you to School District No. 6. We have been honoured to host international students in our schools and communities since 1987. Nestled in the Rocky Mountains of British Columbia, the towns of Golden, Invermere and Kimberley, are committed to ensuring that our international students have a quality experience both in our schools and in our communities. The communities are safe and the spectacular natural surroundings enable students to take full advantage of outdoor pursuits, including skiing, hiking, golf and water sports.

Our high school and middle school programs set high standards for student success and our schools are recognized for those standards. Our international students benefit from a broad offering of academic courses, including senior sciences, mathematics, English and second language. In addition, our students have the opportunity to learn from diverse optional courses, including physical education, outdoor education, technical courses, and outstanding fine arts options including band, choir, art and drama. All three of our secondary schools achieve high standards for our students who graduate with the British Columbia Dogwood Certificate.

While our international students are studying in School District No. 6 they will become part of their homestay families who provide caring homes. The families involve the students in family and community activities, ensuring that the students feel valued, safe and welcomed. The homestay families are truly motivated to assist the students in having an enriching and rewarding experience.

With the dedication of our staff, homestay families and community, the high standards set for student learning, the offering of short-stay, long-term and graduation programs and long history of successful experience in international education, I invite you to contact School District No. 6 and to register your children for our outstanding programs. We would be very honoured to talk with you further about our international education opportunities and to answer any questions you may have.

Sincerely,

Bendina Miller
Superintendent of Schools
